

Simplified, reliable

allergy and autoimmunity testing

Phadia® Information Data Manager software is specifically designed to manage assay runs, test requests and results, and to provide quality control of data and inventory.

SIMPLIFIED HANDLING

- Simple touch-screen monitor, keyboard or mouse to transmit information
- Ensures fast and secure online transfer of test results
- Lab and patient reporting that facilitates quick data interpretation
- Reduces the need for re-runs

UNBEATABLE PERFORMANCE IN:

- Results management
- QC management
- Instrument monitoring
- Stock management

POWERFUL TECHNOLOGY

With this state-of-the-art software, you can run up to 5 Phadia® 100, 5 Phadia® 250 and 5 Phadia® 1000 systems together.

Phadia Information Data Manager is the optimal software solution in allergy and autoimmunity testing.

Phadia[®] Laboratory Systems

From local clinics to the world's largest commercial laboratories, performing up to 30,000 tests per day, there is a Phadia system designed for your needs. Phadia systems offer full automation and unrivalled technology – still the technology giving true quantitative IgE measurements.

A FAMILY TO GROW WITH

When your allergy testing grows you can simply add new Phadia instrumentation without having to abandon your previous system. The unique Phadia Information Data Manager software allows you to integrate several Phadia systems into one network without having to learn new software.

TECHNICAL FEATURES

- Accurate and reproducible test results
- True quantitative measurements
- Large panel of standardized, high-quality allergens and antigens available
- 40 µl serum or plasma needed per test

Phadia Laboratory Systems provide optimal allergy testing solutions using advanced, state-of-the-art technology.
